How valuable would it be to know, **without revealing anyone's identity**, what your friends, and society thought about stuffing rodents down their pants?

4.) Monetizing Your Voice for Humanity (and yourself):

Imagine taking the revenues from your social content, and **instead** of distributing it to special interests and ourselves (like most companies do), **we distribute it to you and your causes. Sounds pretty great, doesn't it**?**

In order to create sustainable impact through your "Persona," **we monetize any of your authorized, anonymous, public social content** (from Facebook to hobby forums, and beyond) **for your personal social causes, plus the equal amount in trade-able benefits, which are as good as cash*.**

Heck, with this new found wealth, maybe you can save some poor ferrets from some suspecting trousers. Man, they have to hate that...
